Cidel Global Equity (Performance shown in CAD)

Cidel

cidel.com

Cidel Global Equity strategy is designed for investors seeking to diversify their portfolios through exposure to international equities. Investors benefit from access to global markets with lower portfolio volatility.

Overview

The Investment is a concentrated equity portfolio consisting of 30 to 40 quality companies from around the world, chosen to access sources of global growth.

The Objective is to exhibit greater total return through dividend and capital growth with lower volatility than the market as a whole.

The Investment Philosophy is founded in our belief that by investing globally in companies with outstanding financial characteristics, strong fundamentals and stable cash flow generation, we can achieve superior performance with lower volatility than the market.

Market Commentary

Over the second quarter of 2017, around the world sentiment shifted to anticipate a broad shift to tighter monetary policy. At the same time, investors took comfort from a generally favourable corporate earnings season. The Global Equity fund returned 4.2% in Canadian Dollar terms for the quarter, comfortably outperforming the MSCI World Index return of 1.3%. The fund's strong returns were driven by the Materials, Information Technology, and Industrials sectors. The only sector that posted negative returns was Energy. The fund is well positioned to outperform in this slow-growth economic climate. Looking ahead, we continue to believe that global equity markets will post positive, albeit modest, returns over the coming 12-18 months.

The Process

Quantitative Screening. Quantitative metrics to identify stocks with attractive valuations and a competitive advantage.

Fundamental Research. Thorough company analysis and management interviews to assess return and future growth opportunities.

Portfolio Construction. Founded in careful diversification amongst high quality global companies to achieve growth without undue

KEY CHARACTERISTICS	Portfolio	Benchmark
